CAREER OBJECTIVE

Dedicated and detail-oriented Software Developer with a passion for building efficient, scalable, and user-centric applications. Possessing a strong foundation in programming, web development, and problem-solving, with a continuous learning mindset and adaptability to emerging technologies. Seeking an opportunity to work in a collaborative environment where I can apply my technical skills, contribute to innovative software solutions, and grow professionally while adding value to the organization's success.

TECHNICAL SKILLS

Languages: Python, C, Java, JavaScript

Frontend Technologies: HTML, CSS, React.js

Skills: Web Development, Responsive Web Design

Databases: SQL, MySQL, Firebase(Beginner)

Tools and Platforms: Git, GitHub, VS Code

Professional: Team Collaboration, Problem Solving

EXPERIENCE

Frontend AI Engineering Intern

Jul 2026 - Present

FlyrankAI (Virtual)

- Learning to develop responsive web applications using modern frontend technologies and AI-assisted development tools.
- Building and improving user interface components with a focus on responsiveness, usability, and performance.
- Utilizing AI tools to accelerate frontend development, code generation, debugging, and optimization.
- Gaining practical experience in frontend application development by implementing modern web development practices.
- Collaborating in a virtual work environment while enhancing problem-solving and software development skills.

PROJECTS

Survey Application

Tech Stack: HTML, CSS, JavaScript

GitHub: <https://github.com/vikivignesh-1704/survey-app>

- Developed a responsive Survey Application for collecting user feedback through an interactive interface.
- Designed user-friendly forms with input validation to ensure accurate data collection. Implemented a clean and responsive UI for seamless access across different devices.
- Enhanced user experience through simple navigation and organized form layout.
- Applied modern frontend development practices to build a maintainable web application.

Language Translator Website

Tech Stack: React.js, JavaScript

GitHub: <https://github.com/vikivignesh-1704/Translator>

- Developed a Language Translator Website using React.js with a simple and responsive user interface.
- Enabled users to translate text between multiple languages through an intuitive interface.
- Built reusable React components to improve code organization and maintainability.
- Focused on responsive design to provide a consistent experience across devices.
- Improved frontend development skills by implementing a real-world React application.

ACADEMIC QUALIFICATION

Sethu Institute of Technology, Virudhunagar

2023 - Present

B.E. in Electronics and Communication Engineering

CGPA: 8.671

Nadar Higher Secondary School, Madurai

2023

Higher Secondary Education - 72.5%

CERTIFICATIONS

- Python - Guvi
- Introduction to MS Excel - Coursera
- Introduction to Internet of Things - NPTEL(Elite)
- Cloud Computing - NPTEL
- Programming in C - Codechef
